

Ecas AG's Environmental Policy

1. Public transportation

All members of the Ecas team whenever viable will travel to meetings by public transport within the Canton of Zurich.

2. Renewable energy whenever client permits

Ecas AG encourages clients to consider reviewable energy options available to them. Although encouraged, we respect the wishes of our clients should they choose not to include these design suggestions.

3. Top quality insulation to building envelope

Ecas AG encourages the use of high-performance building envelopes on their projects. Clients receive a reduction in heating costs along with maintenance charges compared to traditional building methods.

4. Recycling of construction materials

All Ecas employees are encouraged whenever feasible on a project to recycle construction material. If it is not possible to reuse materials, nevertheless it should be separated and made ready for off-site recycling to take place.

5. Reduced printing

All Ecas employees are encourage to 'think before you print'. With the increased use of mobile technology and tablet computers, is it necessary to print this document?
